

INYE INTO OKUFUNEKA UYAZILE NGESIFO ESESULELAYO I-COVID-19 CORONA VIRUS 4*

*Esisifo sisezinye sezifo ezenza kubenzima ukuphemfumla. Umzekelo, ukungakwazi ukuphefumla, Ukugodola, nokuya kwenzinye izinzulu izifo ezifana nezibizwa ngoba zi "Middle East Respiratory syndrome (MERS) and severe Acute Respiratory Syndrome (SARS)".

Le Ntsholongwane isasazeka xa kuthe amaqabaza omntu osele echaphazelekile yintsholongwane engena

Ke ngoko, ukuba ubona umntu okhohlela kakhulu, onomfuxane, nogulayo unako ukwenza oku;

1. Ukungasondeli apho kukhohlelwa khona
2. Ziphephe izihlwele

(amabanga angangomgama olingana nemitsi emibini)

(Abantu abasele benentsholongwane bayakwazi ukungabonakalisi zimpawu, kodwa babe benentsholongwane)

Ngamanye amaxesha amathe omntu osele esulelekile angangena kwezinye iindawo.

Ukuba uthe waphatha ezi zinto ngengozi, waphatha ubuso bakho, wosula amehlo nobuso bomnye, ningagula nonke.
